B. THE PRINCIPLE OF **INDIRECT STEAMING PROCESS:**

1.

The Indirect Steaming uses the vapor that surrounds and infiltrates the food.

2.

It will cook the food quickly without destroying its nutrition.

3.

It doesn't form itip, tutong, sunog or burnt rice.

C. How to Use and Operate?

1. Use the measuring cup to measure the quantity of rice and water desired in the inner cookware.

(Note: 1 cup rice = 1 line water on outside cookware).

2. Make sure the stainless steel inner cookware fits in the center.

3. Add fish or eggs or vegetables in the upper cookware on top of the inner cookware then cover.

C. How to Use and Operate?

- 4. Insert the plug and put cook switch down.**
- 5. The switch will be automatically shut down .**
- 6. Do not remove the cover immediately to complete the steaming effects.**

D. Care & Cleaning

- 1. Do not immerse safety cord and plug set in water or other liquid.**
- 2. Lightly wipe with a soft cloth soaked in hot potable water.**
- 3. Measuring cup and spoon can be soak in water and wash with sponge or cloth.**

E. What are the Benefits?

1. VERSATILE –

Made of Surgical Stainless Steel, the outside cookware can be used to steam, stew, bake or to make soup and many more.

E. What are the Benefits?

- 2. UNIQUE** – Steaming Process or Indirect Process. It doesn't form itip, tutong, sunog or burnt food.
- 3. EASY – TO - USE** – 1 is to 1 measurement - 1 cup of rice & 1 cup of water to put inside the inner cookware & 1 line measurement of water in measuring cup put on the outer cookware.

E. What are the Benefits?

- 4. SAVES MONEY AND TIME** – Automatic Switch with “WARM and COOK” Light Indicator.
- 5. HEAT RESISTANT** – *NutriTECH* Exclusive Bakelite Whistle Knob & Handles.
